

CgiProcess::handleEvents

Process::~~Process

Process::closeInput

```
graph LR; A[CgiProcess::handleEvents] --> C[Process::closeInput]; B[Process::~~Process] --> C;
```

The diagram illustrates a control flow or dependency. Two source functions, 'CgiProcess::handleEvents' and 'Process::~~Process', are shown in white boxes on the left. Two blue arrows originate from these boxes and point towards a target function, 'Process::closeInput', which is shown in a gray box on the right. This suggests that both 'CgiProcess::handleEvents' and 'Process::~~Process' eventually lead to or call 'Process::closeInput'.
